

Alexis Santos.dev

An independent studio. A bold, practical identity.

Websites / Applications / Artificial intelligence

One identity. Different formats.

Primary logo

Use for stationery, flyers, proposals and introductions. The AS monogram and name always keep their supplied proportions.

Symbol

For avatars, favicons and supporting graphic elements. Pair it with the name on first contact.

AlexisSantos.dev.

Wordmark / small horizontal spaces

Charcoal on pearl. White on charcoal. Solid black for one-colour printing. Do not add shadows, stretch the logo or rebuild it with typed text.

Room to breathe. Built to last.

Clear space = at least 1/4 of the symbol height on all sides.

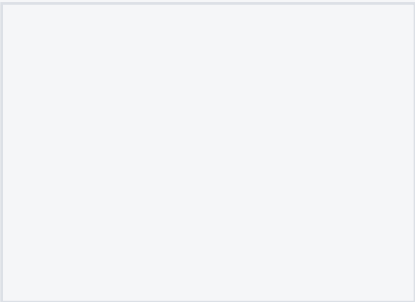

Minimum sizes: full logo 180 px / 38 mm. Wordmark 140 px / 30 mm. Symbol 32 px / 8 mm. For a 16 px favicon, use the supplied simplified favicon, not the full logo.

The custom AS monogram joins Alexis and Santos into a forward-leaning silhouette. A diagonal cut gives the letters space and direction. Keep that cut open at every size; never add a surrounding frame.

Quiet colour. Confident type.

Charcoal
#20242B

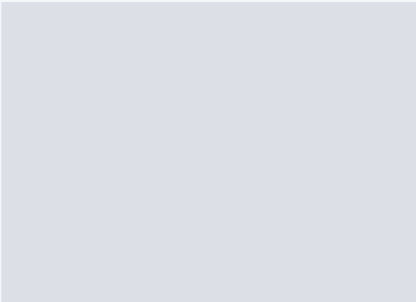

Pearl
#F5F6F8

#DCE0E6

Manrope ExtraBold

Headlines and the outlined wordmark.

DM Sans

Body text, labels and contact details.

Use charcoal and pearl for most of a composition. Blue is a small accent, not a background theme. Product photography may introduce its own colours. Never rely on the accent alone to communicate meaning.

Both font families are bundled under the SIL Open Font License. Print masters use embedded fonts or outlines. HEX/RGB are the digital masters; ask the printer for its ICC profile before a final CMYK conversion.

The voice belongs to a person.

ES

**Diseño con intención.
Tecnología con impacto.**

Speak in the first person. Alexis is the person who designs and builds. Explain what changes for the business: more enquiries, simpler bookings, less admin. Avoid claiming a large team, guaranteed results or clients that do not exist.

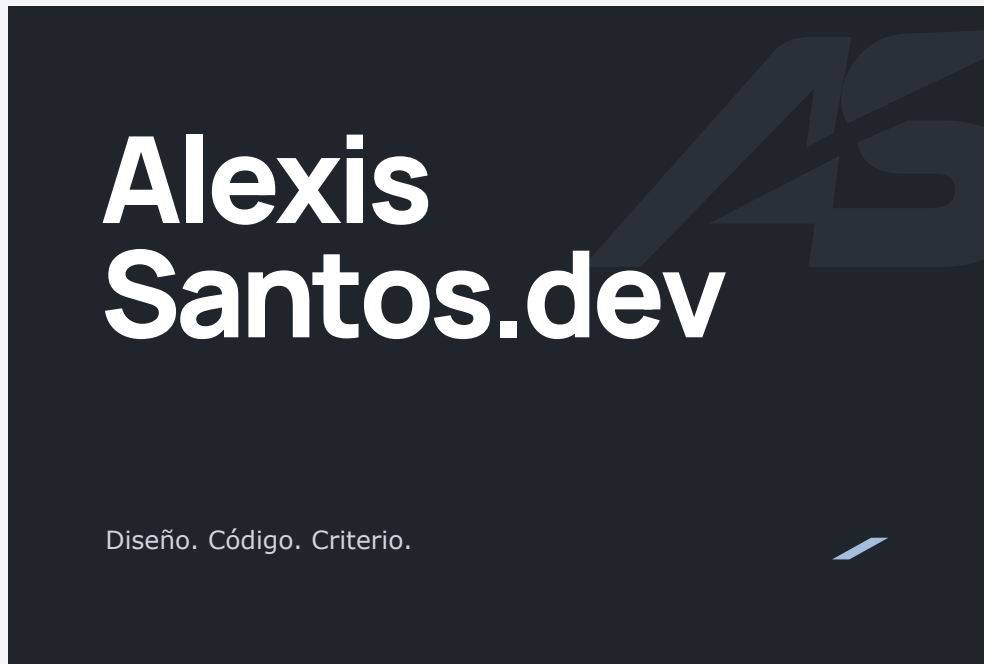

EN

**Design with purpose.
Technology with impact.**

Keep the writing direct and human. Spanish should sound natural in Spain; English should read as original copy. Use the full brand name AlexisSantos.dev. Product brands Breathe Now and Lean Cam keep their own identities.

Imagery: natural light, tactile materials, architecture and real product context. Silver and frosted glass support the identity; they are not the logo. Generated device scenes are illustrative, not literal app screenshots.

Ready for the next conversation.

Business cards: 85 x 55 mm finished, plus 3 mm bleed. PDF pages: Spanish front/back, English front/back. The source SVGs remain editable.

alexissantos.dev

Tenerife, España

A5 flyers: 148 x 210 mm finished, plus 3 mm bleed. PDF pages: Spanish, then English. QR codes point to the language-specific website.

Print at 100%. Keep the TrimBox and BleedBox. Ask your printer for its stock, colour profile and PDF/X requirements; these are vector print masters, not a certified PDF/X press proof. There is no need to invent a telephone number or address.
